Reti leggere ma resistenti, permettono di costruire gabbie e voliere e di creare e ricoprire pollai e recinti per galline, tacchini, oche e faraone.

Light but resistant nets that are ideal for building cages and aviaries and for creating and covering coops and fences for chickens, turkeys, geese and guinea fowls.

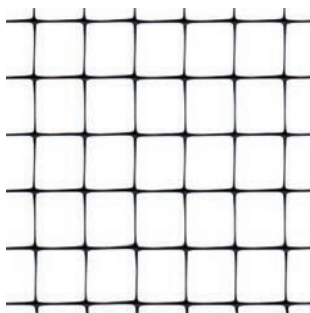

Filets légers mais résistants, permettant de construire des cages et des volières et de créer des poulaillers et des enclos pour les poulets, les dindons, les oies et les pintades.

Mallas ligeras y al mismo tiempo resistentes que permiten construir jaulas y pajareras y crear y cubrir gallineros y recintos para pavos, ocas y gallinas de Guinea.

Das sind leichte aber widerstandfähige Netze, sie ermöglichen den Bau von Käfigen und Volieren und dienen zum Abdecken von Hühnerställen und als Zäune für Hühner, Puten, Gänse und Perlhühner.
